- It analyzes local problems.

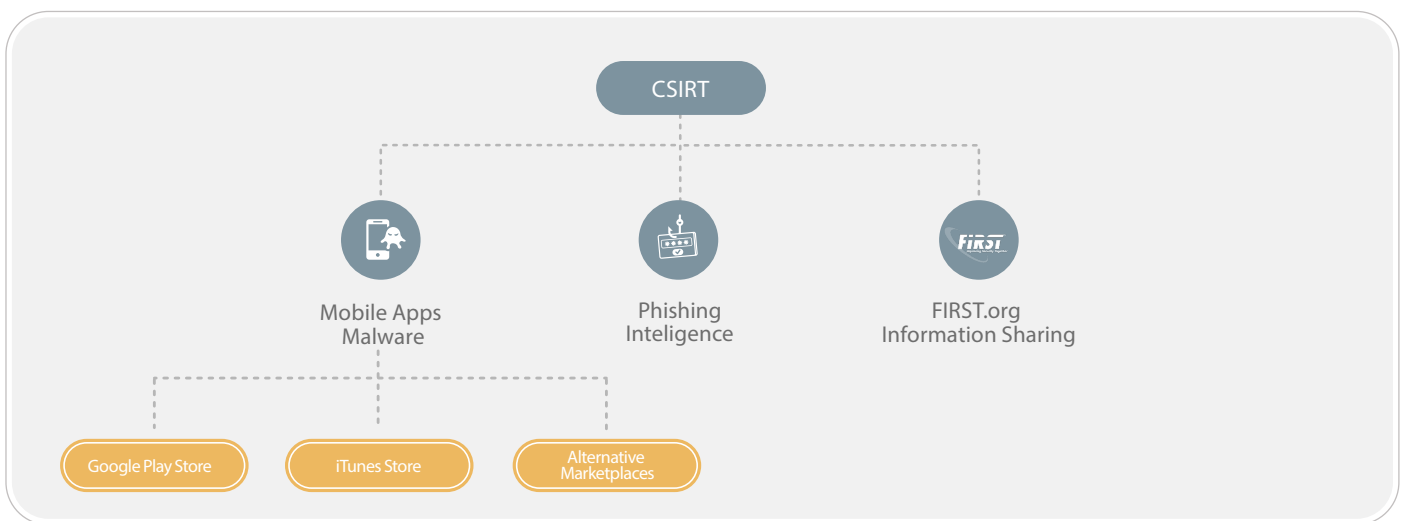

CSIRT

About CSIRT

It is a service that responds to security events that could risk the company's reputation. It helps deleting the phishing sites, delivers malware reports and erases malicious mobile apps from the marketplaces.

It provides a proactive service, in cooperation with Prisma Medio de Pagos, helping in the prevention of potential fraud that could bring economical perjures or damage the company's reputation. It has technical support, available 24 hours a day, 365 days a year.

As a service, CSIRT does not have any hardware or technical requirements. It can be deployed only by exchanging information with VU team.
